minecraft mc Minecraft mod problem with legend I fly too Legendary Beasts BETA 1.9.5 Only - Multiplayer was out of date, but the final release included some of the bugs. A: This is a good question, but you're asking the wrong question. You're asking "how do I get this creature". You can get this creature by: Creating it using BuildCraft Getting a copy of this mod (see below for details). Since you're probably going to want to play a game that involves Nuking/Exploding a lot of things, I'd recommend you download this mod. It's a successor to the popular Cryo Chamber. It has a list of things it does: CHOKING GLAZE VOLCANO ICE SNOW VOLCANO MICRO SHOCK VOLCANO MOUNTAIN WHIRLWIND SCALE BASIC IRON MOUNTAIN SCALE BASIC GYRO IRON MOUNTAIN SCALE BASIC GYRO GIANT IRON MOUNTAIN SHOCKING OCEAN BEACH WHIRLWIND IRON GRANITE WHIRLWIND ICE GRANITE WHIRLWIND IRON BRICK WHIRLWIND ICE BRICK A: You can only get this 'beast' mod from the Mod's site: I would suggest you visit that page, to get more details on the mod. It looks really good.
