More specifically, the present invention relates to a power transmitting device of the kind employing torque-transmitting apparatus comprising friction members constituting a clutch. In a conventional power transmitting device, a rotational power is usually transmitted from a rotational power source to a power transmission member, usually through the intermediary of a clutch, the transmission of the rotational power from the power source to the clutch through the intermediary of the transmission member is usually effected by means of a clutch pedal, and the

transmission of the rotational power 3ef4e8ef8d
