DOWNLOAD: 598d631155. As long as copyright laws remain in place, illegal file sharing is a risk. The most obvious risk that comes with the sharing of media files is an infringement of copyrights, but there are other more intangible risks. Another approach to music downloads is the loss of control over the product. You could unknowingly download a virus that will cause your computer to shut down, cause loss of data, or even damage your hard drive. Controlling the download you receive is critical and can be done with some simple precautions. First and foremost, you must be in control of your downloads. . Hosting or downloading files that you do not have the right to is not safe. To download files, you must have the legal right to access them. . Write down your legal entity information and if you are that a second party to the sharing of files you must know your identity. . Simply writing down your information does not guarantee that you will not be sued. . Be sure your ISP and your country's judicial system is acquainted with the Fair Use laws, . The easiest way to ensure that you have legal ownership of the files you are downloading is to use a secure file sharing program that allows you to set the sharing protocol. . Avoid downloading files that you are not legally allowed to access. . The rise in media piracy affects every aspect of the music industry. As music downloading continues to grow, new business models need to be developed to combat this trend. . Downloading music is becoming a low risk proposition. . For example, iTunes collects information on each songs purchase and makes it available to the artists and music store owners. . In turn, the iTunes store will monitor the songs you purchase in order to improve their customers experience, . For example, music purchased from the iTunes Music Store contains information on the songs relative popularity and the artist's past record sales. . In turn, this helps the iTunes Music Store to create new listings and rearrange music lists that are tailored to a specific location. . However, the users are the primary source of the purchasing data. . If users feel that the artists or music store are utilizing their personal information, they could be reluctant to continue buying the copyrighted materials. . For example, the music store will use the information it collects in order to place the songs in alphabetical order, d4474df7b8
