## Mursit5programiindiriyukle

.mursit5programiindiriyukle Randy Dahl Randy Dahl is an American former Republican politician. He was elected to the Oklahoma House of Representatives in 2014. He had been appointed as the successor of long-time Oklahoman and former state legislator Larry Bell. References Category:Living people Category:Members of the Oklahoma House of Representatives Category:Oklahoma Republicans Category:21st-century American politicians Category:Year of birth missing (living people) Category:Place of birth missing (living people)Q: Creating Data for a one to many relationship I'm using hibernate and I have a user entity. I also have a profile entity, which is just another entity that users can have. What I'm doing right now is creating a new profile for every user, but this is so inefficient. I'm wondering if this is normal. How do I create a Profile entity with a OneToMany relationship between the User and Profile without creating a new profile for every user. Here's the class I'm working with, (I left out irrelevant fields) @Entity @Table(name="users") @Cache(usage = CacheConcurrencyStrategy.NONSTRICT\_READ\_WRITE) public class User { @Id @GeneratedValue(strategy = GenerationType.IDENTITY) @Column(name="id") private Integer id; @Column(name="username") private String username; @Column(name="password") private String password; @Column(name="password\_hash") private String passwordHash; @Column(name="full\_name") private String fullName; @OneToMany(mappedBy = "user", fetch = FetchType.LAZY) private List profiles; I have tried this @Entity @Table(name="users") @Cache(usage = CacheConcurrencyStrategy.NONSTRICT\_READ\_WRITE) public class User { @Id @Generated
