It should have two massive, flat wings at the rear of the aircraft, and look very

much like a biplane. But in the 1930s, the engineers of the Spanish aerospace companies Aerovias de Córdoba and CDA, faced with the need to modernise their aviation industry, decided to modify the existing J-6-9 type, which had been developed from the original Macchi M.3 in the inter-war years, and to call it the J-6-13. Thus, on 20 December 1935, the new J-6-13 was officially put into service
