Category: Grand Theft AutoQ: Accessing objects in ArrayList gives NullPointerException I have a ArrayList of android.graphics.Point objects.

---

This list is initialized from a db value but in a android.util.Pair object. This is my code: `public class NewJourneyActivity extends AppCompatActivity { public ArrayList<Pair> points; @Override protected void onCreate(Bundle savedInstanceState) { points = new ArrayList<>(); boolean allPointsExist = true; while (allPointsExist) { String jsonPoints = getStringFromJson(points); // do stuff allPointsExist = false; } } }` The issue is that this code throws a `NullPointerException` in the following line in `NewJourneyActivity`: `points = new ArrayList<>();` `points` has always a value of `[0,0]` and not null. What I'm doing wrong? I'm using this library to convert json to pair: A: `findViewById` inside `onCreateView` does not return anything. Instead, do this: `public class NewJourneyActivity extends AppCompatActivity { public ArrayList<Pair> points; @Override protected void onCreate(Bundle savedInstanceState) { points = new ArrayList<>(); boolean allPointsExist = true; while (allPointsExist) { String jsonPoints = getStringFromJson(points); // do stuff allPointsExist = false; } } }` ba244e880a
