**EZDrummer 1.3.2 (April-2022)**

---

.. list-table:: :header-rows: 1 \* - Fixes - \* - Improvements  
\* - Enhancements \* - Changes \* - .. \_`Bug Fixes`: ZRTP  
integration ----- ZRTP (ZRTP for WMA/Ogg) is  
an industry standard for encrypting VOIP conversations.  
With the EZdrummer 1.3.2 release, you can support  
ZRTP encryption with the 'ZRTP Encrypt Options'  
settings. The settings page for this option is found under  
Settings->Conversations->ZRTP Encryption Options This  
option lets you configure the ZRTP keys and it's aliases. It  
will also let you create a 'GPG Key' to use for signing  
your message. It is important to note that since the  
EZdrummer can be used for Audio/Video  
communications, it will cause problems when trying to use  
ZRTP in a VoIP context. One of the issues is that the  
ZRTP packet sending data will be stored in a non standard  
location. As a result, the data won't play through your file  
system but rather will have to be sent to the ZRTP sending  
device and then back to the destination device. For  
example, this means that your PC will need a sending  
device such as a Flash Media Server. If you are not  
familiar with ZRTP, please see to learn more. .. image::

November 29, 2557 BC. is an extension, but I can't install

---

it because it says you need to update the toontrack software to the latest version before you can install it. Which means I have already done this and my plugin has already updated the software but it still didn't install the extension. I can only install it in one way: using the "toontrack-plugin.exe" command, but then I can't get it to work with my plugin. I tried installing the extension from another location but it doesn't work. I can't figure out why this doesn't work and I can't find any documentation on how to do it. Any help would be greatly appreciated
