Description: DriverPack Solution is a useful application for Windows, which allows to solve the The post Easily download high-quality Drivers for computers, mobiles, tablets and much more appeared first on KaranPC. Q: How to move cells from one sheet to another based on specific criteria I have sheet "Master" with Columns A-D. In column A I have dates ranging from 2017-01-01 to 2018-12-31. Columns B-D are the IDs of the users of the company. In column E I have a sheet named "requests" with multiple requests. I want to copy the user IDs from column B-D into the sheet "Requests" based on a condition. Here are the rules: The request should be copied only when: The user of the company is requested. The user is requested on a day before the data in column A of the "Master" I tried the following VBA code but it doesn't work: Sub Extract() Dim Master As Worksheet, requests As Worksheet Set Master = ThisWorkbook.Worksheets("Master") Set requests = ThisWorkbook.Worksheets("Requests") Dim Checker As Range Dim Timelog As Range Dim CheckerArray As Range Dim i, k, r As Integer k = Master.Range("A" & Rows.Count).End(xlUp).Row For i = 2 To k If Master.Range("A" & i) >= requests.Range("B" & i) Then 'Copy request requests.Range("B" & i & ":B" & i).Copy End
