Q: Does the android:text of TextView have a property that could change color of a string? I have TextView with android:textColor property, and I would like to change color of a string inside. Is there a property that I could use to do so? Something like that: public class MyView extends View { public MyView(Context context) { super(context); } public MyView(Context context, AttributeSet attrs) { super(context, attrs); public

```
MyView(Context context, AttributeSet attrs, int defStyle) {
    super(context, attrs, defStyle); @Override protected void
    onDraw(Canvas canvas) { // draw something // if some
words inside TextView has the color property, I would like
to change it int fontColor = Color.BLUE; int textColor =
Color.RED; super.onDraw(canvas); } A: Yes, it's
    android:textColorHint. Use it like this:
