A: Well, there are a few things that can be used. You can use technical means, for example, hack their account and then get their data directly from that. You can try to trick their account into thinking you are someone else. One method is using phishing and trick them to a fake web site where they are asked to provide their login credentials. A: Using social engineering can be a good way to get into a facebook account. Typing their name into google, then using the first hit to send the friend request Using email from their friends list Best way to do this is to have a look at the friend list of an account you already hacked. using System.Collections.Generic; using System.Text.Json.Serialization; using Essensoft.AspNetCore.Payment.Alipay.Domain; namespace Essensoft.AspNetCore.Payment.Alipay.Response { /// /// AlipayEcoChemistryMarketingbaseHidaiCouponBaseResponse. /// public class AlipayEcoChemistryMarketingbaseHidaiCouponBaseResponse : AlipayResponse { /// /// `id` /// [JsonPropertyName("coupon_id")] public string CouponId { get; set; } /// /// `amount` /// [JsonPropertyName("amount")] public long Amount { get; set; } /// /// `id` 2d92ce491b
