TopoFusion MapEd provides an all-in-one GPS map editor solution that will let you view, edit and export your GPS tracks on Android and Apple devices. TopoFusion MapEd will allow you to view and export your GPS tracks, export/add waypoints, edit your tracks,

What's New in the TopoFusion Basic?

TopoFusion is a navigation and mapping software developed by TopoFusion Inc. The most convenient way for people to view their GPS tracks and the tracks of others is using web-based maps. In order to allow you to track and view the coordinates of your GPS device on the internet, you must have a GPS device with a built-in Wi-Fi or cellular modem. You can choose from a variety of map services to view the GPS tracks you're interested in. Interface: The TopoFusion mapping interface will provide users with several options that will allow them to view the data stored on their GPS devices. Right away, you will be able to load GPS track maps in the main mapping window. You can zoom in and out, as well as scroll through them easily. You can also preview the data in a small map window in the corner of your display. The track listing section will display all the GPS tracks you have stored on your device, and you will be able to sort these tracks based on the track name, date and time. The folder section will open a navigation window with the navigation interface mapped out. You can drag and drop your tracks between the folders, and the folders will automatically change depending on the time you choose. The route editor allows you to select the start and end points of your tracks and use the provided tools to create loops, split your track or merge into a single track. You can also easily see the coordinates of your tracks by touching the tracks on the map. The route search allows you to select the time period of your tracks and the area you are interested in, and it will search for the coordinates on the map. If you have more than one GPS device, you can also use the TopoFusion web app to transfer your GPS tracks to a computer for editing or viewing. Features: TopoFusion supports GPS track editing, map browsing, map imagery browsing, route search, and route checking. The app will let you view a variety of maps, including satellite images. There is an option to "trip book" your tracks, so you can see the routes of a trip you've recently taken. The app supports GPS track rendering, which is similar to Android apps. It also supports synchronization of the GPS track and route to your device and many other tasks. Locate the points of interest in satellite images The app will show the latitude and longitude of places of interest on the map

System Requirements For TopoFusion Basic:

Minimum: OS: Windows XP/7/8/10 (32/64-bit) Processor: Intel Core 2 Duo 1.8 GHz or better, 2.0 GHz or faster Memory: 2 GB RAM Graphics: Intel HD 4000 or NVIDIA GeForce GTX 550 or better DirectX: Version 9.0c Network: Broadband Internet connection Storage: 8 GB available space Additional Notes: The Xbox 360 dashboard may not be compatible with this game. Recommended: OS: Windows XP/
