**System Requirements:**

This game is meant to run on any system, however if your computer is old it may not have the resources to run this game. I suggest that you use a new computer or buy a new computer to run this game. I will be releasing a patch to the game which will probably solve all of the issues that players have come across, however the patch is to solve my own issues and not to fix any of the old issues that people have encountered. If you have issues that I cannot fix then you will probably have to downgrade your system to be able to run this game.
