VBA is a programming language, originally written by Microsoft for Excel. Autodesk discontinued support of VBA for Windows software in 2011 and stopped creating new VBA plug-ins in 2010, and has no plan to develop the VBA engine for AutoCAD 2013. AutoCAD 2013 does not support VBA scripts, and the only methods to interact with AutoCAD objects from a VBA application are the Application.CommandBars object and the ActiveX Object Library. AutoCAD 2016 and 2017 support the .NET programming language and Microsoft Access, which can be used to interact with AutoCAD objects. These .NET Automation Frameworks have no formal relation to Microsoft Access; they use a different connection model, syntax, and programming model than Access. AutoCAD also supports .NET using Visual Studio .NET. The ObjectARX.NET and Visual LISP.NET APIs are used for programming Autodesk® AutoCAD® 2010. On August 20, 2014, AutoCAD 2014 was released.

AutoCAD 2014 does not support VBA. A number of Autodesk applications have been deprecated by the company. For example, the discontinued EDI data management and document management systems were made obsolete by solutions such as Microsoft SharePoint Workspace, which was first released in 2007. AutoCAD 2014 is the last version to support AutoCAD VBA or Visual LISP. An outbreak of Vancomycin-resistant enterococci (VRE) due to the production of a chimeric aminoglycoside acetyltransferase. A total of 90 VRE isolates (94 per cent vancomycin resistant) was collected from patients admitted to a hospital in São Paulo, Brazil, in 1999. The isolates were characterized by automated methods, and 16 were confirmed as *Enterococcus faecalis* and 74 were identified as *Enterococcus faecium*. All were of human origin. The isolates were divided into two groups, a panel of isolates and a treatment-associated cohort of patients. The isolates had the following resistance phenotypes: resistance to gentamicin (100 per cent), kanamycin (100 per cent), streptomycin (100 per cent), ampicillin (100 per cent) and ciprofloxacin (95 per cent), resistance to chloramphenicol (67 per cent), tetracycline (20 per cent), erythromycin (15 per cent) and amikacin (10 per cent). Resistance to streptomycin and amikacin was associated with production of the recently described chimeric gene *aac(6')-Ie/aph(2'')-IIc*, which results in resistance to both amikacin and streptomycin. None of the isolates possessed an active *aac(6')-Ie/aph(2'')-Ia* gene, which is responsible for resistance to amikacin only. Isolates producing the chimeric gene were also resistant to kanamycin (n = 9, 100 per cent) and gentamicin (n = 9, 100 per cent). In addition, in vitro experiments revealed that the chimeric enzyme was enzymatically active against amikacin and kanamycin.

## What's New in the AutoCAD?

With AutoCAD 2023, you can also work with printed sheets of drawings, ensuring the newest versions of your designs are always in your possession. Use the new Markup Assist function to quickly bring in feedback from the latest versions of your paper drawings. Paper work and collaboration has never been easier: Collaborate directly with other AutoCAD users on paper by using annotative technology to mark, highlight, and edit drawings. Go beyond point-and-click on paper with annotative technology: mark, highlight, edit, and organize your drawings directly on paper. With Snap annotations you can click or swipe to create additional annotative points. Freeform annotations on paper Or annotate other parts of drawings: marks, grids, dimension lines, text and formulas, imported image and video annotations, and more. Intelligent digital paper technology: Smart annotations let you annotate from new angles and places. Turn your annotation into a permanent part of the drawing by typing it directly into the drawing. Annotative paper is designed to quickly mark and accept feedback in the field. Annotations are displayed as highlighted or underlined text or as highlights that change with your mouse. Create interactive workgroups to improve collaboration. Improvements in the Level of Detail (LOD) function: Automatic workgroups allow you to build LOD views with advanced elements and edit those views together. This lets you work on the same set of drawings, regardless of their level of detail. Auto-generate LOD views from new fields, block references, and other annotations. Use annotations to edit LOD views in an easier and more streamlined manner. LOD annotations: Add marks to surfaces and surfaces to blocks, which are then used to build LOD views. Add fields to block references. Add formulas to fields. Add interactive dashed lines to surfaces and blocks, giving you more control over the resulting LOD views. Add dimension lines and text to surfaces and blocks. Create blocks from new fields. Create blocks directly from surfaces. Add and edit annotations to block references. Leverage cloud-based collaboration Intelligent Connections (Web Connect) allows you to connect your AutoCAD drawings to the web and take advantage of the latest version
