Monitoring The Price Crack Free Download For PC

Intuitive and easy to use, Monitoring the Price is a handy and reliable application designed to help you collect and organize information about your products, customers, manufacturers and prices. Features Multiple record types are available Checkout monitor view Add new clients, products and manufacturers Barcode generation Search, sort and compare records Track inventory in a report Calculate average price or average sales price Add notes to any record Print barcode labels or invoices Export records to CSV, XML or HTML Easily create invoices with monitoring information and barcodes Plug-in for Microsoft Sharepoint and SendTo available Monitoring the Price is an ideal and low cost application for all users in all sorts of business fields who want to maintain their own simple and effective pricing history and invoicing. Features: Multiple record types: You can have a separate record for each of your products, with a corresponding record in the client, in the customer, in the manufacturer and in the pricing table. The product can be in any country or region. A client can have one record or as many records as you want, and so can a manufacturer or a customer. You can add any product you wish to the price monitoring list. Simply activate the fields you wish to track and define their type. The product, client, manufacturer and pricing table records all have their own links to the interface. In the customer history, you can see all the records you have assigned to a customer, and you can add a new record. Checkout Monitor View You can use the Checkout monitor view for all your products. You can define the format and number of columns for the view and each record in the view. You can rename the columns and choose which columns you want to display and which to hide. Barcode generation You can choose any number of products for which you want to generate a barcode for your customer, the manufacturer or the retailer (if necessary). The barcode can be generated for any of the product's records, one at a time. The barcode can be transmitted to SMS, e-mail, print, PDF and IPFS. Search, sort and compare records You can search, sort and compare records by any of the fields of the record

Monitoring The Price Free Download [Updated-2022]
