Windows Presentation Foundation (WPF) AutoCAD LT 2008 is a direct component of Microsoft's Windows Presentation Foundation (WPF) suite of APIs and technologies, which use Direct3D and .NET Framework to support the generation of custom user interfaces for computer programs. AutoCAD LT 2008 uses WPF to produce an integrated GUI-based user interface and plotter to view and plot data that use the directX platform (DirectX 8.1 and later), through a development environment based on Microsoft Visual Studio. The WPF for AutoCAD LT 2008 application includes high-performance rendering, rich and intuitive graph, image and map interaction and in-depth auto-sizing functionality, among other features. In 2010, the AutoCAD suite of applications received a major release upgrade (AutoCAD 2010) which included a major redesign of the user interface and enhanced application performance. Windows Forms AutoCAD 2010 is written in the WinForms graphical user interface, and provides support for the Paint, Pen, Shape and Text controls. Markup Import and Markup Assist enables you to "ask" AutoCAD what you need to do to a drawing and incorporate that feedback directly into your drawings, automatically. For example, when you import a simple 2D AutoCAD drawing, you may import the drawing with optional profiles and information that describe the drawing. The imported drawing automatically appears with a new "Ask Me" marker on the drawing's status bar. Click on this marker and you can view a list of edits and profile information that describe the drawing. When you click on a profile, you can then open the profile and navigate to other drawings where the same profile was applied. "Ask Me" markers are also used for blocks, families, tag libraries, and other content that is shared between drawings. Import And Publish Drawing Styles Publish AutoCAD styles to AutoCAD from any Windows applications.
