This forced me to set up the Radeon in my machine to be able to play the game at a decent frame rate and so far it works great. This tutorial will explain how you can download and setup the AMD Radeon drivers so you can play TF2 again. I dont really like the beauty of cli-based cracks. I just use it from time to time. Here is a commandline tutorial on how to install Team Fortress 2 with missing script: I really liked this article: [Inline Commands For Team Fortress 2](#) Good how to links: You will need to get the right version of Adobe Flash, because the game has certain shortcomings in the Flash version (The update is not really working with some computers or with some flash versions, but it should work perfectly with the latest Flash player). The latest version of Adobe Flash (version 10 and 11) is listed here: You must have the latest Flash Version. You can find the newest version of Flash Player on this page: [The Team Fortress 2 Download Page](#) is listed here: And download it here:
