

Windows NT is a proprietary graphical operating system, manufactured by Microsoft, the first version of which was released on July 27, 1993. At the moment, the system is quite common on the market and is used on many computers and servers. The name NT was chosen because by the time the first systems were released, it was the only one that had nothing to do with the name of the previous system released by Microsoft - Windows 1. The system for the first time implemented a multi-document interface (eng. Multi-Documet Interface, MDI), which then became the standard on Windows systems.
