This Fix application will close the Downloader whenever it detects the Downloader process is running.Accuracy and safety considerations in phacoemulsification: the Australian surgeon's view. Accuracy is important with cataract surgery. A number of modern cataract surgery devices have been designed to increase the precision and safety in surgery. There are some concerns, however, that with these newer techniques, the complications of cataract surgery may increase. New surgical devices also often involve safety concerns that need to be addressed during their introduction. The Australian surgeons' view on the accuracy and safety aspects of cataract surgery may therefore be different to the approach of surgeons in other countries. The aim of this article is to present the Australian surgeons' view on these aspects.Characterization of a high-performance liquid chromatography-based metabolite profiling method to study oxidative stress in the liver. The role of oxidants in triggering and/or amplifying liver-related diseases is well recognized. However, the actual details and players remain to be studied. To better understand the role of oxidants in liver disease, we present here a HPLC-based method to study and identify metabolites of
