Keymacro is a powerful Windows keyboard macro recorder with support for Windows 7 and later. It supports the recording of new keyboard shortcuts or hotkeys, as well as macros for common applications such as Internet Explorer, Windows Explorer, MS Office programs and other Microsoft programs. Keymacro lets you record keystrokes that are performed on your keyboard. When you're playing a recording, you'll see a green rectangle with the arrow keys and a dot (..) in the middle indicating the current cursor location in the keyboard macro editor. A record button is available in the lower right corner of the window. You can record one or multiple keystrokes at one time. Keymacro has two modes of operation: keyboard hotkeys and windows shortcuts. A keystrokes are recorded in the first mode and a sequence of hotkeys and window shortcuts are recorded in the second mode. Windows keyboard shortcuts are also recorded in the windows shortcut mode, and the sequence of hotkeys and windows shortcuts will be recorded in the hotkey mode. Keymacro supports two types of templates: keyword-only templates. A keyword represents a short text description. Keywords are used to build up your recording. You can include multiple keywords to specify more than one function. keyword and program templates. A keyword represents a short text description and a program name or program path that will be executed when this keyword is recorded. A keyword and a program template are treated as a single record. This feature allows you to record multiple keystrokes using one template. The program can also be a shell file that starts a specific application. You can create a single or multiple new templates. You can assign the new templates to the hotkey and windows shortcut modes of operation and assign keystrokes to the new templates. Keymacro can export macros to many different formats including Microsoft Excel, Word and Powerpoint, HTML and Windows batch files. You can record multiple files. All recordings are saved as text files. You can easily edit these text files with a text editor. You can also use the export feature to export a recorded file to a dedicated batch file. Keymacro can create keyboard macros for other users. By using the send-key macro option, you can email the macros to other users. You can start a recording by double-clicking the shortcut or hotkey recorded in the shortcut or hotkey mode. You can stop the recording by clicking the red cross in the lower right corner of the window. You can save or export macros 77a5ca646e
