InstallAware Free Edition is the free version of InstallAware, the award-winning free developer tool for creating installers for Windows applications. Get started using InstallAware Free Edition by simply installing it in your Visual Studio or Visual Studio for Mac environment, or right-click on your solution in the Solution Explorer in Visual Studio. Once installed, you can open your existing setup projects and start building your installers right away. You will be able to use the same features as the full-blown InstallAware IDE, including the InstallAware Visual Studio Add-In, InstallAware Component Designer, and InstallAware Project Designer. You will even be able to load InstallAware setup projects that you created outside of Visual Studio, and modify them to fit your needs. And remember, you can even use the Go-Live license included with InstallAware Free Edition, which gives you unlimited redistribution rights for your applications!

Features:

- \*InstallAware for Visual Studio - Create your own .NET applications and installers using a Visual Studio environment
- \*Create your own installers using InstallAware Project Designer and InstallAware Component Designer
- \*Test your installers using the InstallAware Visual Studio Add-In
- \*Use the InstallAware installer for your applications directly from inside Visual Studio
- \*Use the InstallAware component designer from inside Visual Studio
- \*Create installers using InstallAware free edition for Mac OS X
- \*Generate your own Setup projects in InstallAware Free Edition
- \*Apply your own custom install screen styles and layouts
- \*Create your own, custom install screens
- \*Export and install your applications without writing a single line of code
- \*Create multi-language applications
- \*Create applications for Windows, Mac OS X, and Linux
- \*Modify your own Visual Studio applications and use them for deployment
- \*Target 32-bit and 64-bit applications
- \*Target Internet Explorer, Firefox, Safari, and Chrome
- \*Create and publish your own SQL scripts
- \*Target Active Directory, UNC, and SCC
- \*Target applications based on .NET Framework, Web Components, Wix, InstallShield, and NSIS
- \*Target WiX and Burn projects
- \*Use the Windows Installer toolkit and .NET to generate your own installers
- \*Target InstallAware self-extracting applications
- \*Target self-contained applications
- \*Support DLL and EXE self-extracting applications
- \*Target .NET and Java applications
- \*Use the

InstallAware Free Edition is a completely free and open-source Visual Studio Add-In that creates Visual Studio setup projects without any limitations! It is a free alternative to InstallAware Professional Edition, which has all of the features and benefits of a complete installer design tool. InstallAware Free Edition can be used together with existing Visual Studio.Net solutions, but it is recommended to create a new solution, and use it instead. When you do so, you will be prompted for a new Visual Studio license key, which you can use in InstallAware to create a completely free setup project, including a professional-looking and fully-functional installation wizard. Installing Visual Studio 2010, installing all of your projects, and then opening up a setup project created by InstallAware Free Edition is a breeze. Once the installation is complete, your setup project is also ready to use. It can be saved as a standalone setup project, or opened directly in the full-blown InstallAware application. Your setup project is directly compatible with Windows Vista, Windows 7, Windows Server 2008, and Windows 8.

What's included? InstallAware Free Edition includes: ... Installation Wizard (wizard.msi) ... Application uninstaller (uninstaller.msi) ... Application uninstaller v2 (uninstaller2.msi) ... User interface designer (vs\_install.exe) ... Visual Studio Command Prompt utility (vs\_cmd.exe) ... Visual Studio add-in tool for InstallAware (vs\_install\_addin.dll) ... Go-Live License description

InstallAware Free Edition is a completely free and open-source Visual Studio Add-In that creates Visual Studio setup projects without any limitations! It is a free alternative to InstallAware Professional Edition, which has all of the features and benefits of a complete installer design tool. InstallAware Free Edition can be used together with existing Visual Studio.Net solutions, but it is recommended to create a new solution, and use it instead. When you do so, you will be prompted for a new Visual Studio license key, which you can use in InstallAware to create a completely free setup project, including a professional-looking and fully-functional installation wizard. Once the installation is complete, your setup project is also ready to use. It can be saved as a standalone setup project, or opened directly in the full-blown InstallAware application. Your setup project

What's New in the?

InstallAware Free Edition is a highly-extensible free installer authoring tool, providing Visual Studio developers with an unparalleled set of features for creating complete installer solutions. Unlike traditional solutions, which are built manually by hand, InstallAware Free Edition allows you to quickly and easily create solution projects with multiple output files, project references and runtime files for your applications, all of which can be set to work together automatically during setup! InstallAware Free Edition provides a Go-Live license, which means that you can redistribute the setups you create with free version of InstallAware without limitations or royalties, even for commercial use. InstallAware Free Edition requires Visual Studio 2013 or later (you will be able to get the latest version of InstallAware via NuGet by going to or higher. InstallAware Free Edition will automatically install the required runtime components and tools

---

you need for working with InstallAware, including the free Visual Studio projects, together with the most up-to-date versions of .NET 4.0, 4.5, 4.5.1 and 4.6 frameworks and the latest versions of NuGet for each installed framework, including Visual Studio Tools for Office, Visual Studio Tools for SQL Server, Visual Studio Tools for SharePoint and Visual Studio Online. Installation Requirements: Before you begin the installation you must have InstallAware installed and open the Visual Studio environment. You can get InstallAware directly from the Visual Studio Marketplace website or by downloading the InstallAware Installer directly from the URL below: [an-download an-download a-13](#) To get the latest versions of the Visual Studio tools for InstallAware, you can visit and select the Visual Studio Tools for InstallAware package. You must select the VS Tools for InstallAware package even if you don't use the Add-In, because InstallAware Free Edition creates setup projects which require the correct version of the Visual Studio Tools for InstallAware package. To get the latest version of NuGet, you can visit and select the NuGet package. Open the Visual Studio environment, and select the InstallAware Free Edition project from the Installed Projects node in the Visual Studio Solution Explorer. The solution created by InstallAware Free Edition will be loaded in the Visual Studio environment. You may set basic project properties for your installation manually, and
