What's New in the?

RipPix is a picture spicing-up program that allows you to easily transform a photo into an aged one. There are 20 One-touch presets you can apply to your images, including such things like old photographs, torn paper, tattered news pages, rips, and more. With it, you can also add sepia effect to your picture and even cut a photo into 4 pieces. It is really fast and easy to use, especially if you are new to using picture spicing-up software. Besides, there are presets that adjust color levels (e.g. Retro, Retro-N, Retro-N-Soft, Retro-Tones, and Retro-Tones-Soft), contrast and brightness, adjust light-dark balance, adjust shadow and highlight, etc. Apply these settings to your pictures easily. What's new * New feature: Autosave. You can now automatically save pictures to the designated folder, with the preset applied. * New feature: Randomize. You can now randomly select one of the preset to apply to your picture. Like it? Share with your friends! Other Windows Software of Developer «ApplyFactory Publisher Software»: Digital Photos EditorWhen a camera is capable of taking images for all occasions, people are able to have pictures taken in less than inspiring conditions.
