Software Download 3com Baseline Switch 2250 Plus.n Hot Jobs Studienjob: Entwicklung Photoakustischer Gassensor Customs Specialist System. Currently, the database contains more than 18.5 thousand vacancies, of which more than 9 thousand are for representatives of the financial sector. According to the requirements of the European Commission, the automated system for financing trade operations in the Forex market Eurocurrency Trading (Eurcurrencies Trading) must operate on the basis of modern technologies and process large amounts of data. The NEOLANT company (www.neolan.ru...äc.) has developed and implemented a new platform, which is designed to automatically process requests from trading platforms connected to the NEON company system. The integrated software platform allows end-to-end control of all stages of the passage of orders on the Forex market. Using the platform allows you to: Centrally manage all requests for the purchase / sale of currencies from trading systems in the Forex currency market; Set up the procedure for conducting currency transactions in automatic mode, both in classic mode and according to a predetermined schedule; Receive instant notifications about the progress of the execution of orders; Organize prompt exchange of information with the trading platform connected to the "NEoBIT" system; Notify trading platforms that the application has been successfully executed or rejected; Create and transmit requests for transactions that can be carried out automatically, in any format; Perform operations with exchange rates on the Forexa market, taking into account market quotations; Reserve trading positions for trading systems according to a template; Take into account the degree of readiness of the order and, if necessary, automatically conduct operations on margin positions; Carry out transactions with large volumes of financial assets. Notification about transactions with the Forex currency market occurs in real time through the channels of the Internet and mobile applications. To ensure effective interaction with trading platforms and protection against unauthorized user actions, the GlobalDSP system uses a unique identifier "4877" (personal extension number). The NEOS system has an original architecture and operates on UNIX, Java, PHP and .NET platforms. It allows you to support both individual trading platforms and trading sessions, as well as their information interaction with all trading platforms of the "Neolan" company and their clients.
