This is a simple, easy to use timer to keep track of time spent performing a particular action. The tool allows you to track the time you spend working on a sheet, the number of sheets you use, and saves this information on your computer to keep track of how much time you spend on your work. How do I use it? 1. Click on the Run button to start the timer. 2. Then click on the sheet(s) that are used in the Time Sheet 3. A new sheet will be created, and you'll be taken back to the Time Sheet 4. At the end of the work session, click on the Stop button, and you'll be taken back to the Time Sheet. 5. You'll have the number of sheets, the average time of work session, and the time spent per sheet. Count time spent on a work session, and how much time was spend on each sheet Once the timer is started, you can choose to: 1. Track Work Time (The time on the sheet(s) where you work) 2. Track Sheet Time (Total time spent on the sheet(s) where you work) 3. Save the information in the time sheet. Time Sheet Layout This is the number of sheets, the average time, and the time spent on each sheet The Time Sheet layout allows you to choose the number of sheets that are used in the time sheet. File Name: All the information will be saved in the time sheet, with the following format: Time Sheet -> "Work Session" -> Time Sheet Sheet ID Example: Time Sheet: Current Date: 12/31/2012 Time Sheet ID: "12/31/2012 Work Session" Working on: Sheet 1 Sheet 2 Overall Indicate the overall work time on the sheet(s) that are used in the Time Sheet Average Time Indicate the average work time on the sheet(s) that are used in the Time Sheet Time Indicate the time spent on the sheet(s) that are used in the Time Sheet Time Sheet The Time Sheet can be saved and updated at any time. NOTE: All the Time Sheet information will be stored in the same folder on your computer, and you can create as many time sheets as you want. Help Statistic/Graphical View

It's a powerful time-recording and stopwatch application which lets you time and stop a series of activities. You can start and stop recording with a single mouse click. You can also export data as a list of CSV files and save it to a binary file. Advanced features: You can set up multiple Timer Serial Keys with different formats. You can create your own timers. You can synchronize multiple timers and start a recorded activity with a single click. You can mark the starting time and the end time of a list of activities in your calendar with a single click. Key Features: Record multiple activities, one after the other. Record a single activity and then stop it. Stop recording the activities on one button click. Export data as a CSV file. Save the data to a binary file. Use templates. Create and edit your own timers. Export recorded activities to the clipboard. It is suitable for those who want to keep a diary. Create your own commands to quickly start and stop your activities. CometPhoto is a simple and free software application that makes it possible to upload and manage your photos on Facebook. It has a friendly interface and is based on a drag-and-drop system. You can add text to your images and apply different effects, among other tricks. The software lets you create thumbnails as well. You can download CometPhoto from the official website of the developers. Photo-Activity is a free Windows application that allows you to create a personalized calendar using images and maps. It allows you to select the areas of interest in a city or any place in the world, and then upload multiple images and Google Earth maps with spatial data. It also allows you to add a text description. Afterward, the data is converted to a spreadsheet file. It is possible to upload the spreadsheet on the desktop of your Windows PC. Adobe Flash Player Mobile (beta) is a free application that makes it possible to play Flash games on your mobile phone. The beta version of the program can be

downloaded from the official website of the developers. You can access Flash games from a mobile web browser on your device. Photo-Activity is a free Windows application that allows you to create a personalized calendar using images and maps. It allows you to select the areas of interest in a city or any place in the world, and then upload multiple images and Google Earth maps with spatial data.
