This story took me 2 or 3 hours to read since my Mom caught me sneaking a peak at the computer and seeing what it could do. She thought it was funny, but I didn't! I was just paying attention to what was going on while she was doing the dishes. I was hoping that maybe I could snap a few pics of her doing the dishes, but that's a long shot. No one told me they were going to take a picture of my Mom washing dishes. Why do they have to mess with us like that? Anyway, I played with the mouse and clicked a few windows, but I couldn't find a program or anything like that. I looked at my mom a few times, hoping that she was still talking, but she looked like she had her eyes closed. So, I started playing with the computer again, and I was sure I saw a mouse in a picture window that looked like the one I had on my desk and was hoping it was a program like the one I was playing with. I moved the mouse towards the window, and that's when my mom yelled at me! She saw me and she was mad!

When I got back to the bench, I ran my hands through my hair and kicked my feet up a little. Then, out of the corner of my eye, I saw her saying something, "It's alright. I'll just get another computer to play with!" I went back to looking at the computer a few minutes later and just as I was looking at her again, she came back! "Look, I told you that I'm going to get another computer! You have plenty of time to play, but now it's time for dinner!" "Fine! Now I have to eat dinner before I play a game or watch a DVD, but I promise I'll come back later!" I asked her why she was getting another computer, and she said she wanted a better computer. So, I just stayed on my computer and played with the mouse. It was a boring afternoon, but I got to see my mom do a bunch of dishes and I watched her give the kids their baths and things like that. Maybe next time it won't be so boring when we do family things.I hope everyone has a great day! Donation:If you feel this service is worth using, you can make a donation to keep this service running.
