These include: Structural Analysis - Similar to solid modeling, but using shapes rather than solid objects. Fillet, Trim, and Bevel - Create simple curves using a single tool. Polar and Elliptical Tools - Create ellipses, arcs, lines, circles, and even rectangles using a single tool. Layers - Organize drawings by layers, giving you the ability to organize a drawing into a section or part. Fit Layers to Model - Combine multiple models into a single drawing. Snap To Drawings - Automatically aligns objects to the model. Reference Objects - Insert and edit the most commonly used objects from other drawings into your model.
