You can edit and run your code directly from within PyCharm. A: I have used PyCharm for years now and in terms of Python IDE it is quite

powerful and I would recommend to take it for a spin and see for yourself if it is for you. Q: Chrome will not append_http_basic_auth to request.headers I have a Rails 3 app which I am pushing to heroku. This app has an integration with a third-party API to allow logging in and out of the site. When I log in through my iphone I get something like this: "Authorization"=>"Basic" so there is all right with the authentication. When I log out and then log back in through the

app on my iphone however I get: "Authorization"=>"Basic" and so my question is: why would the iphone not be sending the Authorization: Basic base64 string? I have tried to print out each of my headers before sending the request and I am getting this "Authorization"=>"Basic" for my "Authorization" header. I have also tried to add request.headers['Authorization'] = "Basic ***************" to my initializer/initializer_helper.rb file and same result, the iphone

doesn't seem to be adding this header. It is fairly simple code to reproduce so I would really appreciate it if you could help me figure this out. Thanks A: I had the same problem and finally decided to throw in a quick and dirty non-rails solution. I hacked up a filter to massage the
