## WebWork Tracker

### WebWork Tracker Crack+ Free

WebWork Tracker is a Windows app that helps you keep track of your team's web-based activity. It monitors your employees' Web browser activity, and it is able to automatically track when they use certain software or websites, and the number of pages they view and the number of times they exit the browser. This way, you can easily manage your team's activity and ensure they're doing their job. It has some powerful features that allow you to monitor and report on your employees' activity. Key features: - Automatic capture of all your employees' web traffic and activity. - Fully customizable reports - you can create whatever report you need. - Tracks when and where your team members access your sites. - Tracks the total number of pages they view. - Ability to view the number of browser visits your team members made. - Listed in a table, the number of times each employee exited their browser. - Listed in a table, the number of sites visited for each employee. - Listed in a table, the total number of days each employee was logged into the browser. - Ability to create custom reports for your needs. First and foremost, it is important to realize that the software is not an anti-malware tool. Rather, Anti-Malware Booster is a software utility that will help you diagnose and cure malware infections on your system. This means that it can prevent threats from spreading and infecting your system and stop malicious software from sneaking into your PC. That said, the utility boasts robust malware removal features that are based on the engine provided by antivirus program experts. As opposed to other PC cleaner tools that focus on cleaning the registry and browser cache, Anti-Malware Booster makes use of a wide array of additional cleanup options that are designed to speed up the infection removal process and make it more efficient. Key Features: - Remove browser extensions. - Remove browser cookies. - Remove browser cache. - Remove history. - Remove open files. - Remove open/clicked files. - Remove temporary files. - Remove document files. - Remove cookies. - Remove favorites. - Remove feeds. - Remove QuickTabs. - Remove temporary Internet files. - Remove cache files. - Remove temporary Internet files. - Remove all ActiveX controls. - Remove proxy and FTP client settings. - Remove web shortcuts. - Remove Java Script. - Remove Toolbars.

### What's New In WebWork Tracker?

WebWork Tracker is an app that helps you keep an eye on the work-related activity of your employees, with the option to record their online activity, keystrokes, number of mouse clicks and screenshots. It also offers you an easy-to-use web-based user interface to view a complete and detailed report of employee activity and screenshots, as well as an option to automatically export reports to Excel spreadsheets, which is the ideal choice for report generation. At the same time, this innovative software provides the maximum possible user-friendliness, allowing you to directly access a dedicated management dashboard, as well as a set of useful and helpful features, such as automatic snapshot backups or the possibility to exclude certain items from recording in order to reduce the number of extra clicks. Key features: - Record the activity of your employees using screenshots and keystrokes - A built-in management dashboard and Report Generator - A high level of user-friendliness with a Java-based app with no specific requirements - The possibility to exclude certain items from recording - The possibility to export reports to Excel spreadsheets - Support for automatic snapshot backups - A dedicated dashboard for accessing, viewing, and managing the app's features and data - Includes a web-based interface to view and export reports to Excel spreadsheets - Easy-to-use and helpfully named features such as Screenshot Generator, Screenshot Search or Screen Capture

---

Exclusion - Supports the maximum number of screen capture options - A helpful list of all currently recorded snapshots to give you an idea about the performance of the app - Taskbar integration - All reported activities are grouped by Project ID, Employee ID, Company ID, Department ID or Activity ID - Exclude certain activities or items from recording - Support for chat history - Support for all standard Linux, Mac OS X and Windows operating systems - Support for all popular web browsers (Chrome, Firefox, Safari, Internet Explorer, Opera) - Support for Microsoft Office 2007 or higher - Support for Java - Support for PowerPoint, Open Office and other common office software
