Note Technically, Photoshop is simply a utility program. It doesn't do _anything_... yet. But the cool part is that you can use Photoshop to create images by using layers for things like text and images. ## Inserting Photos You use the `Insert Photo` command to insert a photo into your image. Inserting a photo is easy. Follow these steps: 1. **Click the Select or Active

Window button at the top of your screen, and then choose Photo Tools**. The Photo Tools palette appears (Figure 9-3). Figure 9-3. The Photo Tools palette is where you find the tools you need for working with photos. In this example, you see a tool that's used for correcting red-eye. 2. **Click the photo you want to insert, and then drag it to a position in your photo**. Hold down the Ctrl key (Option on a Mac) to lock the photo in

place. You can also press Enter after you press the mouse button. The photo appears at the location you chose, and the top part of the photo is grayed out. This indicates that the photo is a selection. 3. **Use the selection tools to crop the photo or to rotate it, or use the rotate tool to rotate the photo itself**. See the box on Rotating, Cropping, and Correcting Exposure to learn more about these features. 4. **Press Enter to accept the

changes**. Photoshop creates a new layer for the photo, with the photo itself on it. The photo is now overlaid over the existing image or layer in your image. While the Photo Tools palette provides several tools

of this matter.2 III. CONCLUSION For the foregoing reasons, we affirm the district court's order granting summary judgment in favor of UPS. AFFIRMED 2 Although we are not bound by the district court's decision to base its denial of UPS's motion to stay

arbitration on the merits of UPS's petition to vacate, we note that we would reach the same conclusion based upon the merits of UPS's petition to vacate. Q: Transition out the old and in the new views upon returning from another view, Swift I want a transition out the old and in the new views. I first created two views: ViewController_A and ViewController_B and an array of states: var states: [State] = [State(image: UIImage(named:

"home")!, title: "Home", text: "Plz press button to go to ViewController_A"), State(image: UIImage(named: "logo")!, title: "Logo", text: "welcome!"), State(image: UIImage(named: "food")!, title: "Food", text: "wow!"), State(image: UIImage(named: "inbox")
