The present invention relates generally to static mixing devices and, more specifically, to such devices which utilize low boiling point fluids such as the methanol-ethanol-water solutions known as "jet fuel" which finds particular utility as a fuel for jet aircraft. More specifically, the present invention relates to static mixing devices of the type using a pair of spin tubes, a co-axial tube and an axial screw pump. The invention is especially suited for mixing fluid in which is dissolved a low boiling point solvent, i.e., the methanol-ethanol-water mixture commonly known as "jet fuel". Examples 82138339de
