Easy Auto Clicker (formerly H.F.P Auto-Clicker) Full Version Free For Windows

Easy Auto Clicker is a simple-to-use application that lets you configure automatic mouse clicking as well as start and stop the command via a hotkey. It can be used for any kind of activity on the computer which requires repetitive clicks. The tool doesn't integrate complicated options or

customization preferences, catering to all user levels. Straightforward setup and interface Installing it takes little time and minimal effort. Easy Auto Clicker is wrapped in a user-friendly UI based on a standard window which stays on top of other frames and can be minimized to the taskbar while the auto-clicking script is running. It shows all available options neatly organized. Set the mouse button, click type, interval and frequency It's possible to specify the click interval in hours, minutes, seconds and milliseconds, select the mouse button which will perform the click (left, right or middle), opt for single or double click, as well as define the number of times for repeating the

action or allow clicking until it's manually stopped by the user. The main app window also contains two buttons dedicated to starting and stopping auto click. You can either use the default hotkey (F7) for these actions, or change it into anything else, whether it's one key or a combination of two keys.

Evaluation and conclusion It worked smoothly in our tests, without triggering the operating system to hang, crash or prompt error messages. Unsurprisingly, it had minimal impact on computer performance, using low CPU and RAM. To wrap it up, Easy Auto Clicker offers a straightforward and intuitive method for setting automatic mouse clicks. However, it contains only basic options.
