JukeBoxTools is a small, very powerful suite of six stand-alone programs. JukeBox Tools is a collection of six tools to help you with encoding, ripping, tagging and editing MP3, OGG or WMA files. You can rip and encode CD's with ASPI Rip and then use the encoder to edit files and rename them. Audio Editor can edit and tag your MP3, OGG or WMA files. The Jukebox Decoder reads MP3, OGG or WMA files and is capable of decoding them into WAV, FLAC or AIFF files. The AutoRec will automatically read input (CD's, tape, stream) and encode them in multiple formats (MP3, OGG or WMA) and name them. The program also has a visual audio editor and will find silence in audio files and split them into smaller pieces. Finally, the Analog Rip tool reads CD's and tape from a deck that was connected to the PC in your past. It was originally meant for CD's and it does read them from a tape drive, so it can be used for converting your old cassettes to MP3's. JukeBox Tools is free software, and all the files are zipped in a zip archive, that gives you everything with one click from the Start Menu, or from the command line. JukeBox Tools runs under Windows XP, 7 and 8. Using the Wide screen panel you can browse, filter and sort your output using the always quick to use filters (as in all tools in JukeBox Tools) Using the line tool you can edit entries, change the type of audio from WAV, FLAC or AIFF to MP3, OGG or WMA, reenter them to do the same thing as before (just choose the new type). And don't worry, when the entry is finished it is ready to be exported, it is easy to do. Once you exit the wide screen panel, all the information you entered in the wide screen panel are available again. All information includes the exact filename, size, duration, bit rate, sample rate, channels, bit depth, and ID3 tags, comments are also included. You can also build your own ID3 tags, add comments and so on. The software uses the new standardized ID3 tags, and it includes a powerful editor, based on the GTK+ gui toolkit. You can create your own name for the tag, show information about the song, the
