In this quick tutorial you will learn about the differences between the Waves L1 and L2 Ultramaximizer plugins... I think for the L1 plugin, this can really be important... First, Waves L1 is actually L1Fx. L2 Ultramaximizer is an improved version of L1Fx. I would say the Waves L2 is more versatile, although I think the Waves L1 is still considered the best. That's why I would suggest L2, or if there's a cheaper choice, L1, although I'm not sure if you like L1. I think they are both good enough. Second, I'm not sure if L2 can achieve the same result as L1.
