Comentarios. (1).A Rise in New-Business Violations at Amazon in UK Online retailer Amazon.com Inc. has been slapped with a penalty by an Internet content rating body for failing to adequately monitor the content of book and DVD postings on its site. Amazon, based in Seattle, has been ordered to pay £120,000 to Rightmove and its website owner UK Books Online for failing to comply with the Content Rating Code which regulates the ratings applied to book and video products. Rightmove was represented by Charvil Clement of The Clement Law Centre. UK Books Online was also represented by Tony Barton of Dunsby, Booth and McKechnie, Chartered Accountants. The Trade Association for Online Content and Rights Managers (ODC), which set up the Code, said the penalties had not been taken out of the ratepayers' pocket. "It is a very good example of someone being fined a set amount for not being thorough enough in not following their own guidelines," said Julian Rockliff, of ODC. "It's a very, very rare occurrence, if ever. It would have been much more expensive to be sued than be fined, so in the end the money was saved for everyone." Rockliff said the amounts named as penalties had been established after extensive industry consultation. The Code for Content Rating was launched in 2002. It was the result of a general review of ratings for all products sold through online stores and telesales by ODC following negative publicity about inappropriate content. The code covers the content of books and videos sold through several online retailers in addition to Amazon.co.uk. Rightmove's website is the first of these to be checked by the ODC, which became operational in February 2003. ODC was formed by the three major UK content rating and reporting bodies, Rightmove, UK Books Online and The Internet Watch Foundation. The other two members of the ODC are the Association of Online Publishers and the Association of Online Rights Managers. The right to

I want remove all the characters between and from: OxfordOxford university press, 1985Oxford university press, 1990Oxford university press, 1998Oxford university press, 2009 My code: import re answer = 'a' for line in open('book.txt'): result = re.findall(r"", line) for match in result: answer = answer + match[0] answer = answer + ", " print(answer, end='') print("") What is my problem? Thanks! A: I've solved this using two regular expression groups and or group + another group. It matches the text starting with Oxford, then the p element, and then replaces it with another string to be concatenated to your answer. import re answer = " with open('book.txt', 'r') as fi: for line in fi: result = re.findall(r"Oxford(.*?)", line) if result: for match in result: answer = answer + match[0] answer = answer + ", " print(answer, end='') print("") A: To remove the tag and every text inside, you can try this: import re open("book.txt","r").read() with open("book.txt","w") as fp: fp.write(re.sub("","open("book.txt").read())) Sisters and brothers of the Heart Light Recovery and Forgiveness Program are here to help you stay in the Love & Light of Source!
