Photoshop 2022 (Version 23.1)

Currently there are three editions of Photoshop: Photoshop CS5 and CS6; and Photoshop CC. You can buy a standalone license to Photoshop CS5 or a subscription to Photoshop CS5, which gives you ongoing updates to the program, as well as the ability to use any version of Photoshop for a certain period of time. For more information, see Chapter 3. In this book, we cover Photoshop CS5 and Photoshop CC. Photoshop CS6 is similar to Photoshop CS5, but it's a few important features away from Photoshop CC and isn't covered in this book. To get started, load a photo in Photoshop. (For more information on opening photos in Photoshop, check out Chapters 9 and 10.) You can also save images from a web browser to your hard drive and then open them in Photoshop. For example, you can right-click the web browser icon on your desktop and choose Save As to load a file on your hard drive. Then you can open that file in Photoshop. The following sections take a look at the Photoshop workspace and give you an overview of Photoshop's tools. Photoshop: A Quick Tour of the Workspace Photoshop is a program with a lot of features and options, and it's designed to take a lot of your time. You can use its many features, and you can accomplish a lot. But for the most part, Photoshop is a tool for working on an image. The following sections give you a quick overview of the Photoshop workspace. The rest of this chapter focuses on the tools and buttons that are essential for editing photographs. The Image Editor The Photoshop image editor is the central part of the program, as shown in Figure 2-1. **Figure 2-1:** The Photoshop workspace. Click the Image Binoculars button on the top left of the workspace to enable a magnified view of the selected image so you can view details. At the upper-left corner of the image editor are an icon that represents the active image and a set of drop-down menus. The first menu is the View drop-down menu. Each image has a full-screen view (thumbnail image), which is the option you see when you open the program. However, a photo that's opened in its full-screen view has some special keystroke options associated with it. For example, you can crop the image on the fly by holding down the Command and Option keys and dragging the border of the frame to

July 24 (Reuters) - A Facebook pledge on Tuesday to fight self-harm on its photo-sharing website Instagram led to an apparent attack on its platform, sending numerous accounts on the social network into a flurry of activity and spreading animated GIFs that said self-harm is a common form of expression. The pledge, accompanied by a stream of #lighttheworldup hashtags, came amid growing calls for the world's biggest social network to do more to block, ban or restrict accounts and content that glamorise self-harm and suicide. The rapid-fire suspension of Instagram accounts accounted for by the #lighttheworldup movement appeared aimed at highlighting the issue, said @NeedToBreathe - a Twitter account that documented the activity. "Self-harm IS a form of expression. It's nature. It's God. It's how humans are. It's the most visible form of mental illness. How you react is ALL UP TO YOU," it tweeted. A tool that allows users to check what messages they have sent was disabled around 2:30 a.m. EDT (0730 GMT) at about the same time that the hashtag began trending, according to tools released by Find It Online, a web monitoring company. Find It Online said that at least one other hashtag for self-harm, #lighttheworldup, was trending around the same time but that this was not related to the Instagram movement. A Twitter account based in Ireland that tweeted about the #lighttheworldup hashtag said it believed the attack had been provoked by the Instagram pledge. "What we are seeing happening is that groups of people have joined in this #lighttheworldup and are then systematically removing people and groups they believe are problematic," it tweeted. "It is all a bit of a mess and has been building for over 24 hours." The Twitter account said it had communicated with its own users but had not yet reached a consensus on what to do next, and that the responsibility was to the individual users of the hashtag. "Doing this is a privilege. Being able to shut down all of this is a privilege," it tweeted. It was not immediately clear what had caused the shutdown of the Instagram accounts. As of Wednesday, no accounts had been reported as having been suspended, the company said. A Twitter user named Rose was one of several users appearing to be among the thousands of people affected by the blackout.
