Error? I'm trying to debug an error in my Stream
Writer. The issue is that if I enter in debug mode, the
debugger jumps straight to the error, but I am not able
to debug it further because I don't know where the
issue is and I don't know how to get to the stream
writer line that calls the StreamWriter.WriteLine().

Here's what the code looks like: private StreamWriter
logWriter; public void Write(string str) {
logWriter.WriteLine(str); logWriter.Flush(); } A: Solve
by adding a breakpoint before

logWriter.WriteLine(str);. Abstract Zagdolin, that holds
a constitutively high level of iron, was grown in
Lendzian soil on Fe-deficient medium. Fe deficiency
stimulated zagdolin growth. Addition of various iron
sources and chelators to the growth medium inhibited
the zagdolin growth. Iron added into the culture
medium as ferrous citrate also inhibited zagdolin

growth. The zagdolin growth was inhibited by the addition of quinoline. There was no strain growth in the presence of sodium arsenate, potassium chloride and cobalt chloride. The maximum effective concentration of the toxicants was determined. The growth of other Rhizobium species was inhibited by sodium arsenate, cobalt chloride and potassium chloride. Zagdolin can utilize various organic compounds including acetate, succinate, pyruvate, ethanol and methanol. Methodology Colonies of Rhizobium strains were inoculated into YM broth and incubated at 30°C for 48 hours. After the incubation the concentration of bacteria was measured by the colony forming units (cfu/ml). When the cells reached the exponential growth phase, they were cultured in a medium with a defined concentration of the toxicants.
