When I go back to app A, after a few seconds, this error pops up: it enters sleep mode. if I press OK button on it, it will redo the same error. if I click the home button, the phone goes to sleep mode. and if I open the app which has the focus, the same error pops up. With this phone, it works right on 5.0.0. With other phones, it doesn't. I couldn't figure out what's the cause of this problem. Is this a new issue in 5.0.1? Is this caused by the new phone sensor APIs? Does anyone have the same issue? Here is the log of the error. 01-27 08:12:51.330: E/AndroidRuntime(1227): FATAL EXCEPTION: main 01-27 08:12:51.330: E/AndroidRuntime(1227): java.lang.RuntimeException: Unable to pause activity {com.example.android.sudoku/com.example.android.sudoku.Game}: java.lang.IllegalStateException: Destroying activity on backPress by calling finish() 01-27 08:12:51.330: E/AndroidRuntime(1227): at android.app.ActivityThread.performPauseActivity(ActivityThread.java:3405) 01-27 08:12:51.330: E/AndroidRuntime(1227): at android.app.ActivityThread.performPauseActivity(ActivityThread.java:3374) 01-27 08:12:51. 648931e174

A lattice Boltzmann model is developed for a suspension of charged, homogeneously distributed particles which are subjected to a tangential electrical field and a tangential compressive stress field. This model is based on the earlier work of the present authors in which the influence of the viscosity and of a steady flow in the vicinity of the dipolar particles was investigated. The present simulation study is concerned with the effects of an oscillatory stress field and of a finite particle size. Numerical results and discussions are given for the case of a monodisperse suspensions of particles with diameters ranging from 5 microm to 20 microm at a surface density of one particle per area of a (100) GaAs surface. It is shown that both the particle size and the imposed stress field have a strong influence on the electrorotation of the particles.It's a Republican primary for the White House in which Donald Trump holds a comfortable lead but there's plenty of room for more than one candidate to move into the main event

Current version: Killer Fingers.Q: Regex question: delete the prefix, or the suffix, or both string I want to do this with Regex. I have a list of possible format like this: prefix/v1.2.x/suffix prefix/v2.x/suffix prefix/suffix/suffix I want to remove the prefix and the suffix, either one or both, and return the string like this: version/suffix version/suffix version/suffix How to do this with Regex? A: Don't try to parse something with regex if you are not 100% sure it is always going to be what you say it is. In this case the simplest thing would probably be to split the string on /, retain the prefix and remove the suffix: string parsedString = "prefix/v1.2.x/suffix".Split('/')[1].Substring(0, string.Length - 2); Alternatively, if you need to parse a string with a list of possible prefix/suffix combinations, you might want to start by giving Python's re module a try (which is also the standard library's for regular expressions).

The present invention relates to a method for purifying and concentrating carbon dioxide by using a pressure swing adsorption process, as well as to a process for manufacturing a high-purity carbon dioxide and a high-purity carbonic acid gas. Methods for purifying and concentrating carbon dioxide by using a pressure swing adsorption process (hereafter called PSA process) are known. A specific method for the preparation of a high-purity carbon dioxide and a high-purity carbonic acid gas by purifying and concentrating carbon dioxide is known (for example, Japanese Patent Application Laid-Open (
