driver. zipQ: How to run multiple commands in
for loop using parallel in R? I need to execute
a function, the function has many similar
commands that all need to be executed in
different folders. But, because the function
has a loop with a for loop, the function will be
executed over and over again which is slow.
For my purpose I would like to execute the
function in parallel. There is the syntax I am
currently using: library(parallel)
library(doParallel) cl
