As you can see many were being majorly lucky. Of course you can always buy a new tablet (that might be less than the the approximate \$20 per month) but if you're serious about content you might want to seriously consider getting a NOOK Simple Touch. Sure, they're smaller but they are still more expensive, so those are some points to consider. A: Frankly, I wouldn't bother with Simple Touch. It's \$50 and the interface isn't all that intuitive, especially if you're coming from a PC or Mac. Better off is getting a device that already has a tablet interface, such as the iPad. There's no need to buy it with a subscription, since you're not bound to the device. I know, I know, you'll have to get an iOS app, but that's not the hard part, the app is quite cheap. If you are truly obsessed with books, then you'll want a dedicated e-book reader, but the Kindle can do everything else you need, and the iPad can do everything else you need, so if you have neither of those, then just get an iPad. If you want to stick with a dedicated e-book reader, the There's a pretty limited selection of DRM-free titles the user interface isn't nearly as intuitive the screen is much smaller than you'd expect the user interface isn't quite as fluid (the page turns are a bit
