Let's start with the most obvious one. Notation The first thing to realize about Allegretto is that while it is a minor key, it is not an AA key. This means that it has a different scale, starting on different notes than the scale of the regular Major Key. The scale for Allegretto looks something like this: C - Am - G - B - D - F# - E - G# You can play a C minor scale in this manner, simply by starting on the G note and playing the notes of the C minor scale (C-D-E-F#-G#-A-B-C). You should get a cool little sound effect when you are in the process of playing an Allegretto. Some popular uses of the Allegretto key include making sure your bassoon players can easily do the scales that are needed in a D major piece. Students taking the difficult and competitive Admission Test for a Doctorate in Music are expected to play the Allegretto scale. It's an easy way for students to be ready for the test without having to memorize the whole major key scale. The Allegretto is also used in some works to give the music a beautiful yet lighter sound. It is also used in some popular music. Dean Martin is a good example of this. If you listen to his songs, you'll hear this sound in the bass drum and piano. Another example would be the song "Something Stupid." The song is in the key of E minor, and the song uses the G chord a lot, giving the music a great sound. Things to Remember Some of the important things you need to remember when playing an Allegretto include: Bass Notes: A Minor Scale Have a great time playing the Allegretto. It can be a great key to play in music, and if you make the right music using the scale, then it can also sound pretty cool. Terms to Remember Here are some more terms to remember when you play an Allegretto
