The image and text (including file names) attached to the image can then be pasted onto another application which is capable of handling the image format. The ImageFormat property contains information about the image. The BitmapType properties returned by the ImageFormat property may indicate that the image was previously saved in a different format. The Properties property should then contain the data in the original format (in order to allow the image to be restored). The Insert property is the image to insert. The Delete property is the existing image to delete. $-5*c = -4*q - 12, -3*c + 3 + 15 = -4*q$. Suppose $-c*r = -10*r + 120$. Let $g(j) = 4*j**2 - j$. Let i be $g(1)$.
