Category: Programs Program Name: Procyon Home Entertainment Download Link:.Q: VBA Add and Delete values to a Combo Box I'm trying to make a code that will add a new row to a table and then add the value of two text boxes to the combobox cells of the new row. I added the code to add the cells with the values, but now I can't figure out how to delete them. I've tried a few things, but I can't get the deleting part working. A: There are some good examples on How to add row to sheet using vba? Or, you could use the code in the question you linked, but instead of DoCmd.RunCommand acCmdAddRecord,

```
"addtoclient", acForm, "table1",,, "" Use:
DoCmd.RunCommand acCmdAddRecord,
"addtoclient", acForm, "table1", newRow, ""
The second parameter of acCmdAddRecord
can be used to filter out the row. sip:"[xyz]",

Ask HN: Why does HN's reputation stats say I'm the 63rd most influential dev? - robindee I am the most influential dev I know. I mean, I know a lot of dev and even more non-dev.If I am the 63rd most influential dev, why is this number so high? ===== smt88 You'll have to watch the comments on your posts and keep an eye on how many points they get. People will try to game the system by downvoting you, especially the low-ranked non-devs. The posts you submit, and the points they get, are also factors. Reversing good stories means that you should be trying to drive lots of points towards a variety of stories. If you find that

people are voting for your posts off-topic, ask on /newest, and flag the posts as off-topic.
